### DEMOCRATIC TICKET

FOR U. S. SENATOR—FULL TERM.  
J. C. W. BECKHAM.

FOR U. S. SENATOR—SHORT TERM  
JOHNSON N. CAMDEN.

FOR CONGRESS,  
HARVEY HELM.

### ANNOUNCEMENTS

FOR STATE AUDITOR  
We are authorized to announce HUGH H. COLVER as a candidate for State Auditor, subject to action of the Democratic Primary, August, 1915.

FOR SHERIFF  
We are authorized to announce LONG TOM CHENAU as a candidate for Sheriff of Madison county subject to the action of the Democratic primary, August, 1914.

### Proof Positive.

The story is told of former President Taft that when he was a small boy his mother made him a new pair of pants. He put them on and went out to play. He soon returned and said to his mother: "Maw, these pants are too tight; they're tighter than my skin!"  
"No, Willie, they can't be tighter than your skin," she answered.  
"Yes, they are maw; I can sit down in my skin, but I can't sit down in my pants!"

### The Curse of The Crown.

War walks upon your dinner table with both feet. Six weeks of fighting has nearly doubled the price of that lump of sugar for your coffee.  
The flour that made your toast for breakfast is worth a half more than it was before. Cakes, emperors, kings and Kaisers indulged in the luxury of slaughtering men.

There is no way to measure exactly how much less daily income all the people of the United States have than they had on August 1, but there has been a decrease. Hence the war makes you pay more for the things you buy, and takes away from the average person a little money with which to do the buying.

It is a whole lot for the human race to pay just to support crowns upon a few heads.

### Rheumatism Pains Stopped

The first application of Sloan's Liniment goes right to the painful part—it penetrates without rubbing—it stops the Rheumatic Pains around the joints and gives relief and comfort. Don't suffer! Get a bottle to-day! It is family medicine for all pains, hurts, bruises, cuts, sore throat, neuralgia and chest pains. Prevents infection. Mr. Chas. H. Wrenworth, California, writes:—"It did wonders for my Rheumatism, pain is gone as soon as I apply it. I recommended it to my friends as the best Liniment I ever used." Guaranteed. 25c. at your Druggist.

### The Part That Can't Be Forgotten.

It is reported that German soldiers, entrusted with the noble work of destroying Louvain, entered a home where two little girls were playing with their dolls. They crushed the dolls and set fire to the house. The world may some day be able to forgive them for burning the beautiful city, laying waste its houses and sending the people stunned and staggering into the wilderness, but there will never come a time when it will be able to overlook the unspeakable infamy of the human coyote who would deliberately shatter the joy of a child.—Exchange.

### Stop--Look--Listen

Thousands Now Using Wonderful Liver Remedy from Hot Springs, Ark.

There's a better remedy for constipation, liver and stomach troubles than dangerous calomel. Thousands are praising gentle, sure Hot Springs Liver Buttons.  
Make you feel fine—quickly clear up sallow skin and banish malaria and headache.—They are a fine tonic and quickly put an edge on your appetite. 25c at all druggists.

Hot Springs Liver Buttons, Hot Springs Rheumatism Remedy and Hot Springs Blood Remedy are sold in Richmond by RICHMOND DRUG CO.

### DISSOLUTION NOTICE

The produce firm heretofore known as Wides & Sandlin was, by mutual consent, dissolved September 1, 1914. Mr. Wides will continue buying at same location corner Main and Orchard Streets. He will pay highest cash market prices and will treat his patrons as honest and loyal as heretofore. Thanking all for past patronage and trusting to serve all in the future, I am very truly yours

### Important To All Women Readers of This Paper.

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.  
Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.  
If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.  
You may suffer a great deal with pain in the back, bearing-down feeling, headache and loss of ambition.  
Poor health makes you nervous, irritable and may be dependent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.  
A good kidney medicine, possessing real healing and curative value, should be a blessing to thousands of nervous, over-worked women.

Many send for a sample bottle to see what Swamp Root, the great Kidney, Liver and Bladder Remedy will do for them. Every reader of this paper, who has not already tried it, by enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., may receive sample size bottle by Parcel Post. You can purchase the regular fifty-cent and one-dollar size bottles at all drug stores.

### Memorial to Mrs. Wilson.

At the Women's Missionary Conference of the Southern Presbyterian Church, held at Montreat, N. C., it was decided to erect a memorial to Mrs. Woodrow Wilson. It is to be known as the "Ellen Wilson Fund for the Christian Education of Mountain Youth." Since her death it has been discovered that Mrs. Wilson was deeply interested in the mission work among the mountain people of Kentucky, Tennessee, Virginia, West Virginia and the Carolinas, and manifested this interest by her generous contributions. She was paying for the education of several mountain children from year to year. Before her illness Mrs. Wilson had begun a movement intended to provide a large number of these children with better educational and religious advantages.

### United States Almost Independent In Mineral Resources.

Probably no other nation in the world so nearly approaches absolute independence in respect to mineral resources as the United States.

A glance at the statistics of mineral imports affords a means of comprehending in a broad way how great and complex is the task of attaining national independence in the mining, metallurgical and chemical industries.

Last year the imports of mineral products, both crude and manufactured, exceeded \$270,000,000. Of this total, probably \$200,000,000 represents raw materials and crude metals, the value of these imports being about 8 per cent. of that of the domestic output. In this list of imports the larger items named in the order of value are unmanufactured copper, precious stones, nitrate of soda, copper ore and matte, nickel, tin, iron ore, pig iron and steel, petroleum products, manganese ores and alloys, platinum, aluminum, pyrite, graphite, stone, potash and magnesite.

This country has an abundant supply of most of these mineral products that are now imported in large amounts, and as to them it can be independent of foreign countries. The only essential minerals of the first rank of which the United States has no known supply at all commensurate with its needs are nitrates, potash salts, tin, nickel and platinum, the list thus comprising two essential mineral fertilizers and three very useful metals.

A household remedy in America for 25 years.—Dr. Thomas' Electric Oil. For cuts, sprains, burns, scalds, bruises, 25c and 50c. At all drug stores.

### Hard to Believe.

The following is mighty hard to believe, yet the Hardeston Standard vouches for it:

"Some excitement was caused in the neighborhood when Henry Grubbs, who lives on Harry Murphy's farm, about six miles from Bloomfield, purchased a horse from some traveler for \$35. He turned the horse loose in his backyard and it walked around to the front, came in the front door, laid down on the bed and died. His nose came just to the edge of the bed and his legs were bent at the knees, giving him a very human appearance. The cause of the horse's death is unknown."

The course of the war in Europe has been hidden with singular completeness from the press and the people of two continents. Directly contradictory reports are given out by the official staff of every nation, and not until days have passed has it been possible to get a even faint idea of the progress of the war.

Monte Fox was in Stanford Friday en route to his home in Danville from Madison county, where he bought 500 cattle, weighing from 1,350 to 1,500 pounds, at \$2.25 to \$2.60 per hundred. He bought 207 head from Harvey and Thos. Chennault and a bunch from Covington, Gay and others. This was one of the biggest cattle deals made in several months. The cattle were exports and were shipped to New York for the market there. —Interior Journal.

### INSTRUCTS AMBASSADORS.

Secretary Bryan Tells Diplomats Abroad How to Conduct Affairs.  
Washington.—Secretary Bryan issued instructions to diplomatic and consular officers of the United States who have been entrusted with the interests of the nation now at war.

Few realize the delicate position of this office, the duties suddenly thrust upon them and the consequent amount of labor they are compelled to perform.

United States diplomatic and consular officers are serving the interests of Germany, France, Belgium, Russia, Great Britain, Austria and Japan.

In the instructions sent out by Secretary Bryan the American representatives are cautioned to not overstep the straight line of their duties for fear it would make the neutrality of the United States appear partial. The instructions said, in part: "Bear in mind the general usages of nations in relation to the functions exercised by you on all such occasions."

Further, the instructions added, "The care and protection of the interests of the nations for whom you are acting are based upon the consent of both foreign governments concerned. This consent may be withdrawn at any time by either or both."

Another instruction, "Bear in mind you are the representative of a neutral power whose attitude toward the parties to the conflict is one of impartiality."

An explanation by state department officials of the instructions showed that, in the main, the attitude of the representatives of the United States acting for the belligerents is that of a vehicle of communication; also to protect the property and natives of the nations for whom they are acting.

In this connection the instructions state that before seeking recourse to the raising of the American flag over the embassy, legation or consulate of the nations for whom they are acting as a means of protecting them strong representations should be made to the government in whose territory the property may be located and that necessity may be avoided.

### WARRING POWERS OWN NEARLY ALL OF AFRICA

### Natural Resources of Possessions Among Richest.

Washington.—The African possessions and protectorates of the European powers now at war are more than three times as large as continental United States. They are more than three times as large as all of Europe now plunged in war and are eleven times larger than England, France, Germany and Belgium, which control them. They occupy 9,697,531 of Africa's 11,513,000 square miles.

"The largest individual holder of African territory is France, with 3,812,000 square miles, more than 1,500,000 of which is the Sahara desert," says the society's statement. England controls 3,618,245 square miles, Belgium, with Belgian Congo as its sole possession, 802,000 square miles, and Germany 1,035,086 square miles. These figures make surprising contrasts with those of the European holdings of these countries. European France consists of 207,054 square miles; England, 121,391 square miles; Belgium, 11,373 square miles; Germany, 208,789 square miles.

"England leads in the population of her African dependencies, with a total of 40,458,500 inhabitants, more than 2,000,000 of whom are Europeans. The bulk of her white population is in the Union of South Africa, which consists of Good Hope, Natal, the Transvaal and Orange River Colony and in which dwell nearly 1,500,000 'foreigners.' There are approximately 40,000 people living in French African possessions, more than 1,000,000 of whom are white. The center of France's white population is Algeria, where nearly 800,000 Europeans and 5,000,000 natives live. There are 15,000 people in Belgian Congo, 5,405 of whom are white, and 12,265,500 German subjects in her dependencies, of whom nearly 20,000 are Europeans. Thirteen thousand of these live in German Southwest Africa.

"The natural resources of many of these African possessions are among the richest in the world. The Union of South Africa, under British control, exported in 1910 \$154,503,000 in gold and \$40,199,000 in diamonds. The imports and exports of Algeria, a French possession, exceeded \$233,000,000 in 1912. Belgian Congo's exports now pass the \$15,000,000 mark annually, while Germany's colonies are sending to other countries about \$25,000,000 worth of produce annually."

### LIGHTNING SKINS A MAN.

Bolt Passes Down His Back, Paralyzing Him.

Orlando, Fla.—The narrow escape from death by lightning of Charles Nystrom, a former Scandia (Kan.) citizen, is miraculous. Striking him on the back between the shoulders, the bolt passed down his back and legs, partially paralyzing him from the waist down.

He was literally skinned alive, and his outer skin was burned to a crisp. At last accounts he was regaining the use of his limbs in spite of his terrible experience, but it is thought he cannot recover.

### Richmond a Good Town.

Richmond is a mighty good town, worthy of the best of everything. That's why we have joined the American Drug and Press Association and offer to our people the Meritol line of preparations, made by the Association and sold only through its members. There is nothing like these goods, guaranteed in every way. We want Richmond people to have the best there is, so we offer you this line. Ask to see the Meritol goods. Wines' Drug Store.

### DAIRY and CREAMERY

### DAIRY COW RECORDS.

Scales and Babcock Test Essentials in Determining Profit and Loss.  
[Prepared by dairy division, United States department of agriculture.]

The condition of the farming industry as seen on the average farm points to the need of better business methods and more definite knowledge of the sources of profit and loss. In no department connected with the farm is there more need for absolute data than in the dairy. The records of both progressive and unprogressive dairymen indicate that there is no business which shows a greater range of profit than that of dairy farming.

Records of the performances of dairy cows form the only accurate and safe basis for judging their value. It is the constant aim of progressive dairymen to improve their herds, and such improvement must depend largely upon culling the herd and getting rid of the unprofitable animals.

A record is also of great help to the feeder. If he knows exactly what a cow is doing he can prepare the ration

Brown Swiss cattle in their native land are of light or dark brown color, a mouse brown being popular. They are large, heavy headed, thick of neck and heavy of bone. The thickness of neck, however, is relative, and one will see many cows with very neat necks and heads. If one could judge by external appearances he might think that tuberculosis was unknown among these cattle. These healthy condition, large heart girth and big middles surely indicate healthy interior anatomy. The Brown Swiss in this country, having developed good milking qualities. The picture shows a Brown Swiss bull.

accordingly and often feed more economically. Again, a daily milk record enables a dairyman to detect the approach of sickness in a cow and thus to take steps to ward it off.

The record of the herd is a matter of the utmost importance. The highest degree of success cannot be attained unless dairymen know the productive capacity of each individual cow. This is necessary as a guide to rational treatment and to insure the greatest profit. The record should include not only the dairy performance, but a concise history and description of each animal. The former requires a daily record of the milk yield of every cow and a fat test of several consecutive milkings, if accurate records are to be secured. Samples for this test may be mixed and this "composite sample" tested, thus obtaining the average. The method is easily learned and practiced. With the percentage of fat taken periodically and a summary of the daily yield of milk, the dairyman has a full record of production for every cow in his herd. To give still more complete knowledge there should also be a record, at least approximately accurate, showing the cost of the feed consumed by each cow, so that the economy of production may be shown.

The scales and the Babcock test are essential requisites for every true dairyman. One dairyman's cows may produce twice the yield and return double the profit of those of another with the same market, simply because he used greater intelligence in his business.

Accurate and continuous records are necessary for best results. Examples show the impracticability of trying to determine the profitable cows by mere guesswork. One dairyman found the cow he had picked out for best to be fifth on his merit list when actual records were taken.

The time and expense required in keeping records are small compared with their value. In some instances one minute to a cow at each milking, or two minutes a day, has been found sufficient to record the weight of the milk and take the sample. On this basis when milk is weighed and tested every seventh week, as is customary with some dairymen, only one hour and thirty-eight minutes would be required yearly for each cow tested. With this amount of time expended a reasonably accurate record can be secured of every cow in the herd.

The Cost of Silage.  
A field of corn that will yield from fifty to sixty bushels to the acre will make anywhere from eight to ten tons of silage per acre as it comes from the silo. A silo sixteen feet in diameter and thirty-two feet high will hold about 130 tons of silage. This would take about fifteen acres of corn to fill. Can you imagine any other way of getting 130 tons of green, succulent feed at such a small outlay of expense? Of course there is the expense of putting up the silo, which must be taken into consideration, but many of our practical and experienced feeders figure that the saving by virtue of the silo is about \$1.50 per ton, or, in other words, practically enough to pay in a single season the cost of constructing the silo in many instances.—Hoard's Dairyman.

### Chamberlain's Colic, Cholera and Diarrhoea Remedy

"I advised the 'boys' when they enlisted for the Spanish war to take Chamberlain's Colic, Cholera and Diarrhoea Remedy with them, and have received many thanks for the advice given," writes J. H. Houghland, Eldon, Iowa. "No person whether traveling or at home should be without this great remedy." For sale by all dealers.

### YOU ARE READING THIS AD.—OTHERS WILL READ YOURS

MOST everybody reads the ads. in this paper. They furnish as much news to the man in town and on the farm as the personals, and often more. If Peter Smith's wife wants a new hat, Smith sees by the paper that Jones is selling hats at so much. Johnson's store ad. is missing from the paper—Johnson's trying a non-advertising policy.

RESULT—Jones gets Smith's money—Smith's wife gets her hat.

### Saved Girl's Life

"I want to tell you what wonderful benefit I have received from the use of Thedford's Black-Draught," writes Mrs. Sylvania Woods, of Clifton Mills, Ky.

"It certainly has no equal for the gripe, bad colds, liver and stomach troubles. I firmly believe Black-Draught saved my little girl's life. When she had the measles, they went in on her, but one good dose of Thedford's Black-Draught made them break out, and she has had no more trouble. I shall never be without

### THEDFORD'S BLACK-DRAUGHT

in my home." For constipation, indigestion, headache, dizziness, malaria, chills and fever, biliousness, and all similar ailments, Thedford's Black-Draught has proved itself a safe, reliable, gentle and valuable remedy.

If you suffer from any of these complaints, try Black-Draught. It is a medicine of known merit. Seventy-five years of splendid success proves its value. Good for young and old. For sale everywhere. Price 25 cents.
